

DDS Freight, an all-in-one solution
dedicated to forwarding

Plan and track shipments, control margins

Designed in collaboration with transit and transportation professionals, DDS Freight covers all needs in terms of transport planning and tracing. A genuine operational tool, it gives full control over import and export files, covering both transport (air, sea, road) and customs and all sale and purchase operations, all in real time.

One tool, three key assets

Performance

File control, data reliability, cost anticipation, process automation; DDS Freight makes it possible to optimize all transport operations for more productive teams and processes, whatever their type. Thanks to its reporting and performance assessment tools, it also makes it possible to have a bird's eye view of all activities.

Traceability

Thanks to its shipment tracing and real-time notification capabilities, DDS Freight allows

transport professionals to reduce the risk of litigation by enabling them to avert incidents and maximize responsiveness with customers for greater QoS, anywhere, anytime.

Flexibility

Use DDS Freight the way you want to, choosing one module or several. Sold as a license or available online in SaaS mode, it provides flexibility of installation and use, combining security, value and evolutivity.

Specific modules for each transit operation

- **TMS Transit Operation:** Import/export files management, quotations, shipment declaration, groupage, billing, document creation...
- **Monitoring and statistics:** Analysis of operation, monitoring of incidents, profit per file...
- **Invoice Control**
- **CRM:** Salesforce monitoring, management of prospects and commercial actions ...
- **Tracing and Alerts:** Traceability of import/export operations and notifications at each modification.
- **Order management:** Supply and shipment management...

Ultimately, DDS Freight brings:

Tighter cost control

Through improved file supervision, cost anticipation and margin control.

Fast ROI

Greater team productivity and faster ROI.

Improved QoS

Deliver real QoS to your customers and partners.
